Collaborating to Enhance Nationwide Impact

SOS Certified Training Institute Development

The Makayla Fund helped to support the development of the SOS Certified Training Institute. This new training program provides comprehensive youth suicide prevention education to adult champions who become certified to deliver SOS trainings in their communities. The goal of the SOS Certified Training Institute is to increase our shared impact by training volunteer trainers to redeliver trainings all over the country. The Guerrieros helped SMH launch the first institute in September 2015. Over the past three years, we have conducted 9, 2-day training institutes, certifying over 150 trainers to carry our youth suicide prevention message forward to their communities.

Parent Portal Development

The Makayla Fund's support will allow schools to reach parents with critical suicide prevention education in the privacy of their homes. Many barriers stand in the way of parents attending a school-hosted parent night on suicide prevention. Because the Makayla Fund helped to support the development of an online portal for parents, SMH will provide schools with the opportunity to engage parents online. Parents can watch suicide prevention videos, read interactive content, and take a mental health screening on behalf of their child- all from the comfort of their home or phone. The parent portal will be available to all SOS schools around the country for the 2017-2018 school year.
